## Commitment. Craftsmanship. Partnership. Solutions.

ASC is a full-service project management and fabrication company specializing in a wide range of custom aluminum products, including fabric awnings, architectural canopies, bahama shutters, routed signage, patio railing systems, walkway canopies, and standing seam awnings.

With two strategically located manufacturing facilities in Angola, Indiana, and Edgewater, Florida, ASC is equipped to manage projects efficiently across all 50 states and the Caribbean, supporting national, regional, and local programs of all sizes. These locations allow us to provide consistent quality, reliable lead times, and responsive service regardless of project scope or location.

Our priority is to deliver high-quality products and comprehensive services at competitive pricing, helping our clients strengthen brand identity, improve functionality, and enhance the overall appearance of their buildings and storefronts.

---

**All products shown in this book are shown in their standard form.** We offer full customization for every product listed. Please contact our National Sales Manager, Josh Noecker, for a free project review.

## Your National and Local Partner

A full-service project management company specializing in awning and sign projects provides comprehensive support to meet customer demands and requirements. **By overseeing every aspect of the process, from initial consultation and estimating through design, manufacturing, permitting, and installation, we ensure a seamless experience.** We offer turnkey services for all projects, and our experienced team of accounts and project staff excel at managing national programs at scale. Our turnkey services include, but are not limited to:

- Site-surveys
- Code Research
- Permit Procurement
- Delivery
- Installation
- Drafting
- Engineering
- ...and more

# Architectural Canopy

Adjustable Hanger Arms

Cantilevered

- Architectural canopies offer a durable, attractive solution for exterior shading on commercial and industrial buildings.
- ASC's architectural canopies can be cantilevered or mounted with adjustable hanger arms. Both mounting options use the building's existing structural support system and help distribute wind and snow loads over large areas.
- Fully welded and constructed from high-strength extruded aluminum, they are lightweight and built to withstand the elements.
- ASC offers a wide range of standard and custom paint and powder-coat finishes to ensure a long-lasting, high-quality appearance tailored to your project's needs.

## Features

- Exterior shading solution
- All-extruded aluminum
- High-load wind and snow capacity
- Maintenance-free
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- Cantilevered
- Adjustable hanger arms
- 6", 8", or 12" gutter fascia
- LED soffit lights
- Draining scuppers
- C-Channel fascia available
- 3" x 6" self-mating roof aluminum pans
- Wide variety of standard colors available
- \*Custom specs & colors upon request

# Bahama Shutter

*Collapsible Arms Shown*

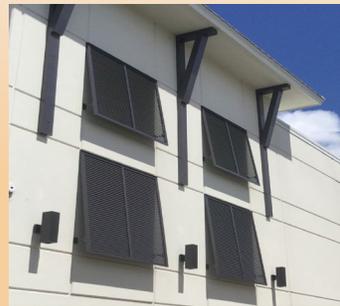

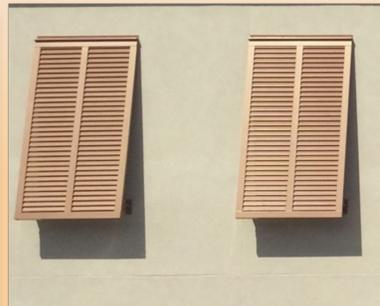

- Aluminum bahama shutters offer a durable, low-maintenance alternative to traditional wood shutters while adding an attractive, tropical aesthetic to your windows.
- Available in fixed or collapsible configurations, these functional shutters provide privacy and protection from the elements.
- Lightweight aluminum construction, combined with high-quality paint or powder coat finishes, makes installation simple, and shutters can be shipped ready to install with included mounting hardware.
- ASC offers a wide range of standard and custom paint and powder-coat finishes to ensure a long-lasting, high-quality appearance tailored to your project's needs.

## Features

- Exterior shading solution
- All-extruded aluminum
- .080 perimeter frame
- Top hinge
- Maintenance-free
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- Fixed arms
- Collapsible arms
- 2" Bahama blade
- 2" Z-style louver blade
- Wide variety of standard colors available
- \*Custom specs & colors available upon request

# Standing Seam Awning

- Standing seam metal awnings offer a durable, low-maintenance alternative to traditional fabric awnings while providing a sleek, modern look for commercial façades.
- Commonly used for storefronts, entrances, walkways, and windows, these awnings are constructed using 24-gauge galvanized metal pans joined with a hidden fastening system and mounted to a lightweight aluminum sub-frame that can be custom-built to your project's specifications.
- Designed for easy installation, standing seam awnings can be shipped ready to install with mounting hardware included. For more complex applications, ASC's experienced project management team provides full-service support, including design, permitting, engineering, and installation.

## Features

- Exterior element solution
- All-extruded aluminum welded sub-frame
- 24 GA. deck panels
- Ridge cap
- Maintenance-free
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- 8", 12", or 16" pan widths
- Open ends
- Aluminum pan or panel closed-ends
- Snow guards
- Drip edge
- Mill-finish or paint-to-match underside
- Wide variety of standard colors available
- \*Custom specs & colors available upon request

## Metal Canopies

# Sunshade

Airfoil Blades Shown

- Sunshades provide a durable and visually appealing solution for enhancing exterior shading on commercial buildings while reducing glare and improving occupant comfort.
- Constructed from fully welded, high-strength extruded aluminum, these sunshades are designed to withstand the elements and are available with three blade profiles to achieve the desired architectural look.
- A wide range of standard and custom paint or powder coat finishes ensures long-lasting performance, and flexible mounting options, including rigid or adjustable hanger arms, allow the system to utilize existing building structures while efficiently distributing wind and snow loads.

### Features

- Exterior shading solution
- Lightweight construction
- All-extruded aluminum
- Wide variety of build profiles to fit project
- Maintenance-free
- Corrosion-free
- Powder coat or paint
- **USA Made**

### Standard Options

- 2" x 8" perimeter tube
- 4' max projection
- Blade options:
  - Airfoil
  - Rectangular tube
  - Plate
  - Z-blade
- Rigid hanger arms
- Adjustable hanger arms
- Wide variety of standard colors available
- \*Custom specs & colors available upon request

# Utility Awning

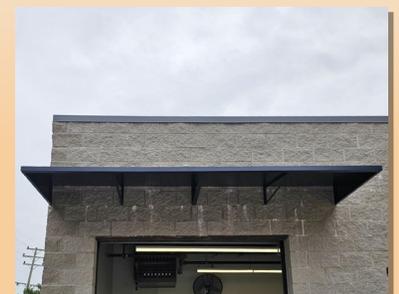

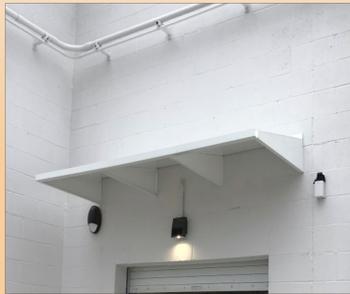

- Metal utility awnings provide a cost-effective, durable upgrade from traditional fabric awnings, delivering both function and a clean, modern appearance.
- Constructed as a seamless, one-piece aluminum structure, these lightweight awnings are low maintenance and ideal for commercial and industrial applications, while remaining versatile enough for use anywhere a fabric awning is installed.
- Available in a wide range of standard and custom paint or powder coat finishes, metal utility awnings offer long-lasting performance and can be easily mounted to new or existing buildings, with standard widths that may be combined to accommodate larger spans.

## Features

- Exterior elements solution
- Lightweight
- All-extruded aluminum
- .090 seamless aluminum
- Brake formed
- Maintenance-free
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- Aluminum-faced closed-ends
- 2" x 2" Integrated gutter
- Mounting hardware
- Wide variety of standard colors available
- \*Custom specs & colors available upon request

# Fabric Awnings

## Common Styles

Shed

Slant

Waterfall

Marquee – Walkway

Convex (L-Shaped)

Dome

## Features

- Exterior shading solution
- Functionality and form
- Lightweight aluminum frame
- Wall-mounted or walkway
- Staple groove attachment system
- Corrosion-free
- Powder coat or paint
- **USA Made**
- LED light (downlit and backlit) compatible
- Wide variety of standard fabrics and colors available
- Mill-finished or color-to-match frames
- \*Specialty fabrics & colors available upon request

- Fabric awnings provide a durable and attractive solution for enhancing exterior shading on commercial buildings while adding style and functionality to outdoor spaces.
- Commonly installed over windows, doors, drive-throughs, walkways, and patios, these awnings offer protection from sun, rain, snow, and wind while helping reduce energy costs by limiting heat and glare.
- Built with high-strength extruded aluminum frames and industry-leading fabrics, ASC's fabric awnings are designed to withstand the elements and are available with a wide range of options, including LED lighting, an array of graphic applications, rigid PVC lettering, decorative panels, and decorative frames.

## Awning Styles

- Shed
- Slant
- Waterfall
- Marquee
- Convex
- Dome
- Radium Marquee
- Gable Marquee
- Box
- Concave
- Hipped Shed
- \*custom shapes upon request

# Architectural Bands

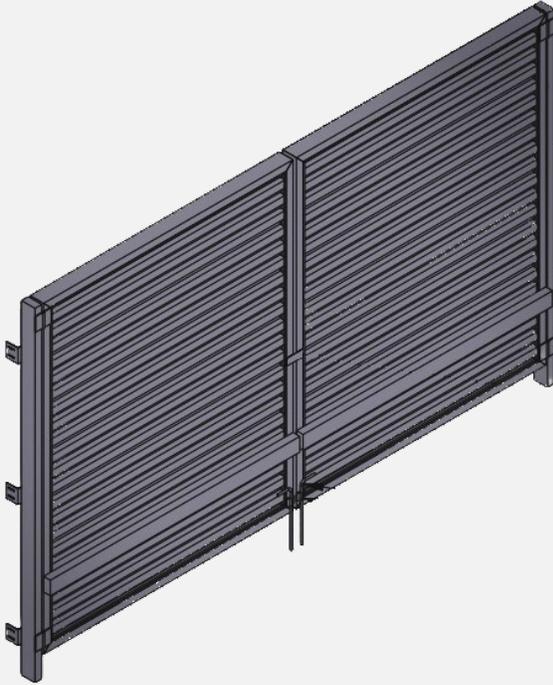

- Adding aluminum architectural features to a commercial building enhances both performance and visual appeal while delivering long-term value.
- Aluminum is lightweight, corrosion-resistant, and low-maintenance, making it ideal for exterior applications that must withstand the elements over time.
- In addition to their durability, aluminum architectural elements can be custom-designed in a variety of finishes and configurations, allowing them to seamlessly integrate with a building's design while improving functionality and overall occupant experience.

## Features and Options

- Exterior decorative solution
- Lightweight
- All-extruded aluminum
- Simple installation
- Corrosion-free
- Powder coat or paint
- **USA Made**
- Brake formed to size
- C-Channel
- Industrial Channel
- 2" x 2" Integrated gutter
- Wide variety of standard fabrics and colors available
- \*Custom specs & colors available upon request

# Dumpster Gate

Front Gate Detail

- ASC's commercial dumpster gates offer a durable, secure, and visually appealing solution for maintaining clean and organized exterior spaces.
- Constructed from high-quality aluminum, these enclosures can be customized to fit specific dimensions and design preferences, delivering a sleek, modern appearance that enhances the overall property.
- A wide range of standard and custom powder coat finishes provides long-lasting protection against rust and corrosion, making aluminum dumpster enclosures a low-maintenance and cost-effective option.

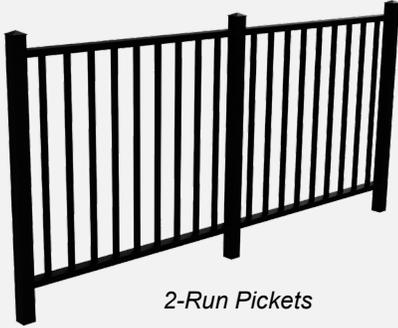

## Features

- Exterior privacy solution
- Lightweight
- All-extruded aluminum
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- 2" x 4" tube frame
- Heavy duty hinges
- Hasps
- Cane bolt and cane sleeve
- Support posts for ground mounting
- \*Custom specs & colors available upon request

# Railing System

2-Run Pickets

3-Run Pickets

ADA Handrail Example

- Outdoor aluminum railing provides a durable and attractive solution for patios, fencing, walkways, retaining walls, and site dividers.
- Fully welded and constructed from high-strength aluminum alloy, these systems are designed to withstand the elements and everyday use while offering both vertical and horizontal picket options.
- A wide range of powder coat finishes ensures long-lasting performance and visual appeal.
- Safety-focused by design, ASC railings meet 4-inch sphere requirements, feature a standard minimum height of 3 feet for ground applications, and can include fire exit or panic bar hardware for gated access when required.

## Features

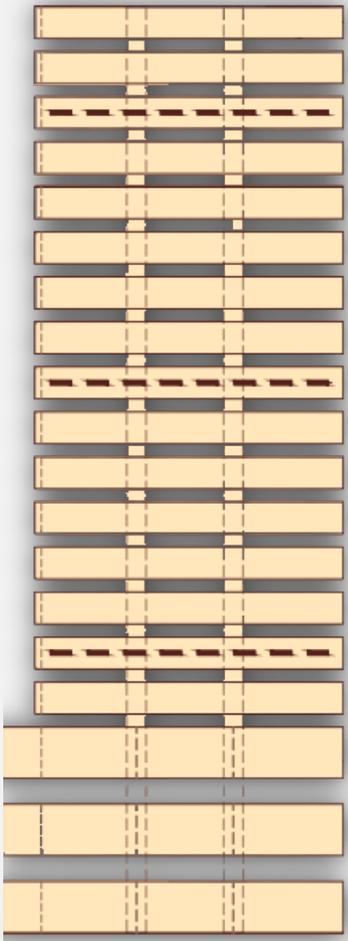

- Decorative perimeter solution
- All-extruded aluminum
- Vertical picket design
  - 2 and 3-rail options
- ADA compliant
- Push bar or panic bar compatible
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

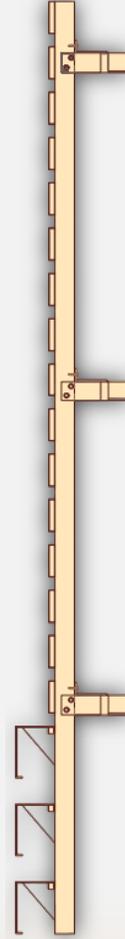

- 1" x 2" rail channel
- 2" sq. post caps
- 2" x 2" sq. tube posts
- 36" minimum eight
- Base plate or core-drilled base attachment
- Heavy Duty gate hinges
- Wide variety of standard fabrics and colors available
- \*Custom specs & colors available upon request

# Slat Wall System

Front Detail

Side Profile

- Exterior aluminum slat wall systems provide a durable and visually striking solution for enhancing commercial building exteriors.
- Designed for architectural versatility, aluminum slat walls can be arranged in a variety of patterns and configurations to create a modern aesthetic while offering protection from the elements.
- Lightweight and low maintenance, these systems are built for long-term performance and are available in a wide range of standard and custom paint or powder coat finishes, allowing seamless integration with any design vision.
- With extensive customization options in materials, sizes, and finishes, ASC can tailor slat wall solutions to meet the unique needs of each project.

## Features

- Exterior decorative solution
- Lightweight
- All-extruded aluminum
- Corrosion-free
- Powder coat or paint
- **USA Made**

## Standard Options

- 5" horizontal aluminum slats
- 3" x 3" x .093 vertical support tubes
- Louvered gussets
- LED lighting compatible
- Wide variety of standard fabrics and colors available
- \*Custom specs & colors available upon request

# Graphics Solutions

## Banners

ASC utilizes the industry's best wide-format inkjets to bring you larger-than-life images to display wherever you want!

## Vinyl Graphics

Utilize your window space for advertising and promotions. Perforated window vinyl allows you to display a vibrant window graphic with one-way visibility from the inside.

## Decals

Wall, window, and floor vinyl can be adhered to virtually any surface! Make your branding stand out with our durable, fade-resistant vinyl decals.

## Flex Faces

From custom awnings, to sign cabinets, our three-layer printing process allows us to create vibrant Flex Face material for your illuminated signs that keep your image highly visible day and night!

- ASC's Graphics Department provides a full range of digital print and graphic solutions to support your branding and marketing needs, from awning graphics to wall and window vinyl.
- Whether you supply a finished design or collaborate with our creative team, we offer end-to-end project support using industry-leading wide-format inkjet technology.
- Our in-house printing capabilities include white ink and a three-layer printing process, allowing us to produce vibrant, high-impact graphics such as banners, vinyl decals, sign graphics, murals, and more.
- UV-cured inks ensure fast drying, exceptional color quality, and long-lasting durability across a wide variety of materials and applications.

## Features and Capabilities

- Superior graphics solutions
- Digital print to fabric capable
- 10' – 6" max print width
- 1mm max media thickness
- UV-cured ink for beautiful colors day and night
- Durable and scratch resistant images
- White ink capable
- Three-layer printing process
- Print resolution up to 1,200 dpi
- Wide variety of printing substrates available
  - Gloss
  - Matte
  - Opaque
  - Clear
- \*Custom specs & colors available upon request

# Non-Illuminated Signage

Rigid PVC Logo

Push-Thru Routed Aluminum

Push-Thru Routed Sign

Flat Cut Out with Applied Vinyl

Routed Acrylic Panel with Faux Neon

Routed Aluminum Sign

- ASC's high-quality signs are fabricated from industry-approved materials such as aluminum, polycarbonate, acrylic, wood, and other durable substrates, making them an ideal solution for long-lasting, low-maintenance signage.
- Suitable for both interior and exterior applications, non-illuminated signs are commonly used for parking signage, monument signs, tenant panels, wayfinding systems, nameplates, menu boards, lobby signage, and more.
- With extensive material and design options, ASC delivers custom signage that enhances brand visibility, stands out from the competition, and meets project timelines with efficient turnaround times.

## Features and Options

- Branding identity solution
- Lightweight
- Highly customizable
- Corrosion-free
- Powder coat or paint
- **USA Made**
